San Pedro town centre to be transformed with more than €2 million investment with the aim of the works is to semi-pedestrianise the areas between the town and the boulevard

-

The aim of the works is to semi-pedestrianise the areas between the town and the boulevard, making the latter more accessible.

Planned in Marques del Duero, pavement, street furniture and signage will be renewed, as well as the entire sanitation network, telecommunications infrastructure and natural gas distribution network.

There will also be a new public lighting, irrigation and electricity.

More importantly, street parking will be eliminated, making the area more pedestrian-friendly once the sidewalks have been widened.

Marques del Duero will also receive a new museum dedicated to the artist Vicente de Espona.

The works have been awarded to company Obras Generales del Norte for €1,090,566, paid for by the-Provincial Council.

They will begin in March 2017 and are expected to last 10 months.

A further €1,099,297 will be invested into the Avenida de Andalucia and Avenida de la Constitucion,-although detailed plans have not yet been released.
